

Estimated time needed: **10** minutes

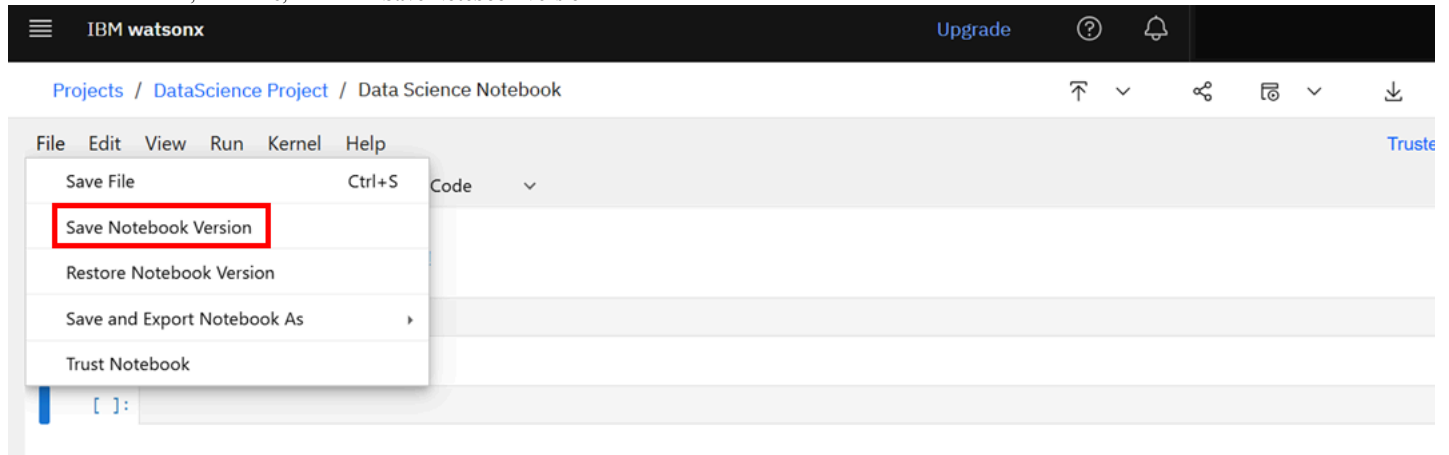

Objective for Exercise:

- Share your notebook from watsonx.ai

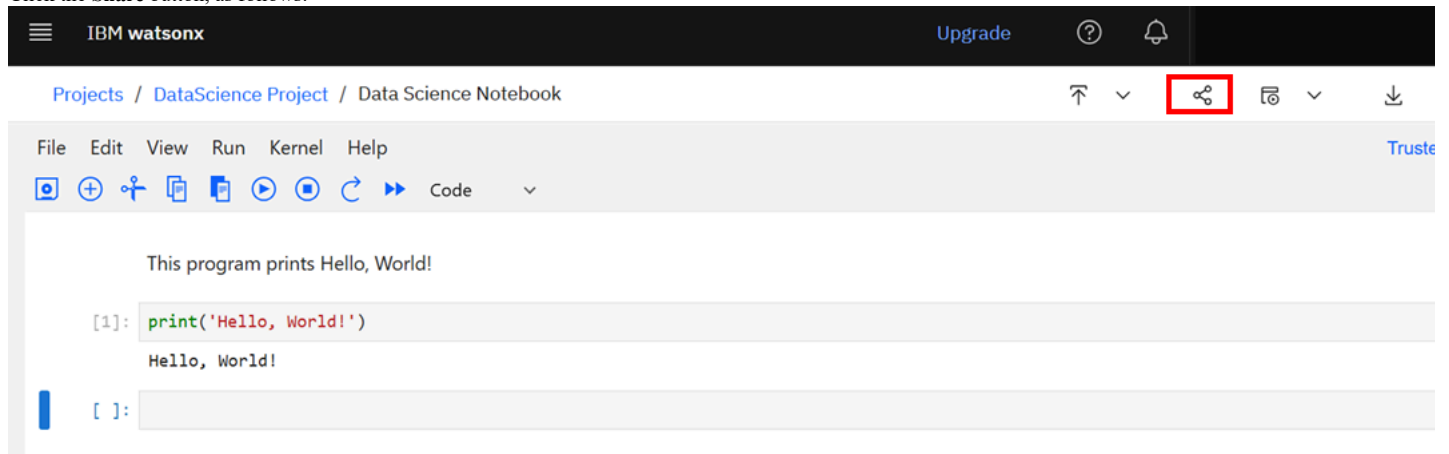

Step 1: Share your notebook from watsonx.ai:

Once you complete your notebook you will have to save and share it to be marked.

To save the notebook, click **File**, and select **Save Notebook Version** as shown below.

Click the **Share** button, as follows:

Select the following settings to retrieve a public link to your Jupyter Notebook

Share: Data Science Notebook

Share with anyone who has the link.

Cell content

☐ Only text and output

☐ All content excluding sensitive code cells

☒ All content, including code

If your notebook includes credentials for data sources, you might want to remove such sensitive data from the notebook or hide it (see option 2). A version is saved for your notebook. The link always points to the most recent version of the notebook.

Permalink to view notebook

<https://dataplatform.cloud.ibm.com/analytics/notebooks/v2/b01a1a5e-4280-4c>

Share on social media.

Close

Paste the URL in a new browser window and check if the notebook is rendered as intended before sharing it for review with your peers.
